

Adequate Yearly Progress

In addition to California’s accountability system, which measures student achievement using the API, schools must also meet new requirements set by the federal education law known as No Child Left Behind. This law requires all schools to report how well students are achieving based on a concept called Adequate Yearly Progress (AYP).

To meet AYP, elementary schools must meet three criteria. First, a certain percentage of students must score at or above proficient levels on the California Standards Test (13.6 percent on the English test and 16 percent on the math test). These goals must also be met by all ethnic and socioeconomic subgroups of students. Second, the schools must achieve an API of at least 560 or increase the API by one point. Third, 95 percent of the student body must take the required standardized tests.

If a school fails to meet even one of the criteria, it fails to meet AYP. While all schools must report their progress towards meeting AYP, only schools getting federal funding to help economically disadvantaged students are actually penalized if they fail to make the mark. If these schools fail to meet AYP for two consecutive years or more, they must provide special services to students, such as a transfer to a different school or tutoring. In some cases, the school faces intervention from the state of California.

The table at left shows where we met our AYP goals. The gray dots represent where we’ve met our goals; red dots indicate goals we missed. Just one red dot is sufficient to cause us to fail to attain what NCLB defines as “adequate yearly progress.”
